

Jordan Reyes

Chemical Engineering — Graduate Student

jordan.reyes@email.com | linkedin.com/in/jordanreyes | Waterloo, ON

SUMMARY

Chemical engineering graduate student with a focus on reaction engineering and process systems for energy applications. Experience spans catalysis research, process simulation, and a national case-competition win. Interested in sustainable fuels and CO₂ conversion research.

SKILLS

Aspen Plus • MATLAB • Python • Reactor Design • Process Simulation • Catalysis • Data Analysis • Technical Presentation

EXPERIENCE

Process Engineering Intern — Placeholder Process Solutions Ltd.

May 2024 – Aug 2024

- Built an Aspen Plus model of a distillation train, identifying an estimated 9% energy savings opportunity.
- Worked with plant engineers to validate simulation results against operating data.
- Documented findings in a technical report presented to the process engineering group.

Case Competition Winner — National Chemical Engineering Case Competition

Nov 2023

- Placed 1st of 24 teams for a proposal on CO₂-to-fuel conversion process economics.
- Led the technical modelling workstream under a 48-hour competition format.

Undergraduate Research Assistant — Catalysis & Reaction Engineering Lab

Jan 2023 – Present

- Studied catalyst performance for CO₂ conversion to synthetic fuels using a bench-scale reactor.
- Maintained lab equipment and trained two incoming undergraduate researchers.

EDUCATION

B.A.Sc. in Chemical Engineering, University of Waterloo (Expected 2026) — Dean's Honours List.
